## Pedal Power

Play Poles are proud to be the exclusive distributors for the Pedal Power playground equipment throughout Queensland and Australia wide.

Staying active is important, but so is having fun!

Pedal Power equipment is designed for two people, encouraging social interaction and teamwork.

Both adults and children can use most of the equipment as there are two seats set at different heights to allow for longer legs.

This provides the opportunity for families and friends to exercise together.

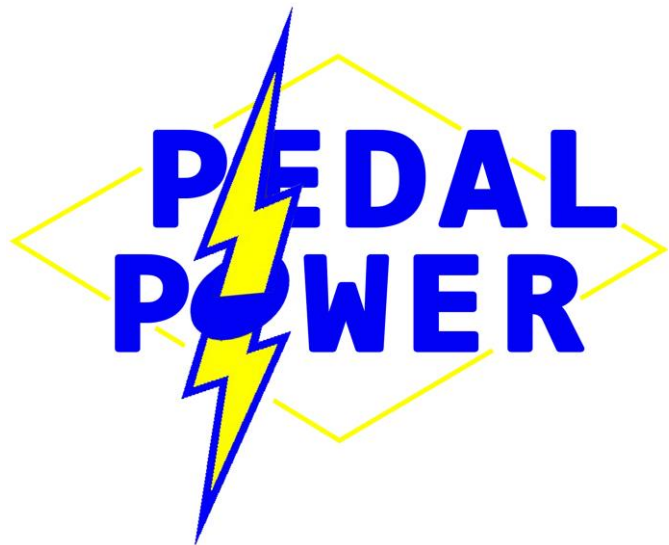

### The Coaster

The Coaster moves in a circular motion whilst going up and down, resembling the motions of a roller coaster.

### The Velocitron

As the Velocitron riders pedal, the speed increases and centrifugal forces lift the riders outwards and up into the air.

**PEDAL  
POWER**

### Mono Cars

As you pedal the monocar travels smoothly along the rail track.

### The Monorail

The Monorail consists of two or more bikes/cars set on a track which adults & children can use. There are normally two seats set at different heights to allow for longer legs.
