## Shade Sails and Shelter Structures

Play Poles know that being sun smart is important, especially in our harsh Australian summers.

Shade sails and shelters are an attractive and effective way of protecting young bodies from the sun.

Play Poles can design and install custom made shade sails, shelters and roofing solutions to suit your new or existing playground.

All of our shelter structures are constructed of high quality steel and have a customisable Colorbond roof. All shade sails are UV stabilised and come in a variety of colours.
